

## **My Goals**

**1. Why do I want to learn this skill? What does it mean to you? What are your motivations? Will you prove something to yourself or people around you? Will you get a raise because you're better at your job or will you get a better job?**

I want to learn this skill so I can become more independent and have a skill that can be used to build something. I do not want to be in a position where I have to rely on sales interactions to make sure that I have income coming in to support myself and my family.

Doing this is important to me because of the opportunities that I believe are out there in this field. Additionally, the financial stability and security it offers.

I will be proving this to myself in addition to the people around me. I've committed to doing this with my loved ones as well.

**2. What will I achieve if I learn this skill? Which doors will this skill open for you? Will you be able to earn more, have more flexibility in your work hours, work remotely and travel more?**

By learning this skill I believe that I will have a greater chance to make a better income, have more flexibility during work hours, work remotely, and travel when I please. All of these things are desirable to me.

**3. How will this skill change my life and my career? Would you get a raise at your current job or more respect from your boss once you've learnt this skill? Or will you be at Facebook, Amazon or Google instead? How would your life change?**

Learning this skill will change my skills, day, and life. Instead of serving other people food and drink or selling them some product that makes their lives better I will have the opportunity to build things virtually.

I will be leaving the service industry behind and getting the opportunity to work for another corporate company that can offer me health, life, 401K, and potentially retirement options.

My life would change a lot, if my wife and I decide to travel. If we want to work remotely from some far off place, we can!

**4. How will learning this skill impact the lives of my family, friends and coworkers? What will you be able to do for your family or friends once you've learnt this skill? How will it change the way they think of you? Will your coworkers respect you more?**

I would be home more often, I would not be so socially drained and can spend my social energy on them rather than others.

I will be able to build a better life for my family. More income means that we may be able to purchase a home, get more financially stable, travel more, experience life more.

I'm not sure how it will change how they think of me.

**5. How will I feel if I never accomplish this? Would you feel disappointed? Would you feel like you've missed out?**

I will be absolutely disappointed if I don't do this. I will also feel like I missed out on a huge opportunity for my life. I feel this skill will offer me the chance to move into a better field, better life, better financial position, better emotional position, and just all around a better life that I will enjoy and be happy with. If I fail, I will not be happy staying in the position I am in now.

**6. What would my life look like if I manage to accomplish this? Visualize it. What would life look like from the moment you wake up to the time you go to sleep? Will you be living by the sea? Would you kiss your beautiful wife/husband when you wake up?**

I hope to be able to spend my time working from home or remotely. Working from my home office or laptop somewhere that I will be happy and healthy with my family.

My ideal work week would be a four day work week. My ideal work day would start early where I would workout, then come home and have a good breakfast, code or program until lunch time, eat a good meal, go for a walk, do some things around the house, water out plants, work some more, until making dinner with my wife, eating with her and talking about the day, maybe have friends over for dinner, then spend the evening hours with my family watching tv

or playing games, Lastly going to sleep happy to start another day. Looking forward to the challenge
